Northland Ear, Nose & Throat Associates Joins the St. Luke's Family

Duluth, Minn. - St. Luke's is kicking off the New Year with welcoming Northland Ear, Nose & Throat Associates, P.A. to the family. The clinic will now be known as St. Luke's Ear, Nose & Throat Associates.

The clinic has served patients in the Duluth area for more than 25 years by providing high quality, comprehensive ear, nose, throat, head and neck care. Specialists Dr. David Choquette and Dr. Todd Freeman will remain with the practice and have been integral members of the St. Luke's medical staff for years.

"We're looking forward to continuing our working relationship with the specialists and other members of the ENT staff for years to come," said St. Luke's President and CEO John Strange. "Welcoming the group to the St. Luke's family is the right fit for our patients. It's another way we can give them the best possible care."

The clinic will continue serving patients at its existing location, St. Luke's Medical Office Pavilion, Suite 301, as well as at outreach locations throughout the Northland.

###

About St. Luke's

St. Luke's is a regional health care system serving approximately 500,000 residents of northeastern Minnesota, northwestern Wisconsin and the western Upper Peninsula of Michigan. It includes a multi-specialty hospital in Duluth, a critical access hospital in Two Harbors, and 38 primary care and specialty clinics throughout the region. It is a charter member of Wilderness Health, a regional health care provider collaborative working to improve patient quality and outcomes.
